dettagli / details

gamma / range

Listec LI glitter è un listello glitterato in alluminio per rivestimenti decorativi in ceramica.

La sezione del profilo si integra con i formati rettificati in gres e la profondità fissa di 8 mm lo rende versatile e adattabile ad ogni spessore di piastrelle superiore a 7 mm grazie anche agli appositi spessori compensatori. Il glitter applicato sul profilo viene protetto da una speciale resinatura protettiva antigraffio e antiurto.

LISTEC LI glitter glittery aluminium decorative listello for tiled walls.

Its square section matches with porcelain stoneware rectified edges and its 8 mm width makes it versatile and suitable for all tiles thickness over 7 mm, thanks also to its shims.

The glittered surface is covered by a special protective resin layer, against scratches and bumps.
