WEST architectural hardware Catalog 2012

WEST architectural hardware: timeless serenity

When visiting ancient shrines in Japan, you will sometimes notice white sand symbolically formed into a conical shape. This is known as a *morizuna* and is said to signify a landmark for the descent of a god, while the white sand signifies the purification of the place. In other words, a *morizuna* is a symbol that expresses the spirit of hospitality when welcoming an important person.

Wishing to inherit this spirit of hospitality, WEST has produced a range of products based on a conical form. No matter how the era and the environment might change, we wish to continue producing products that will welcome people with warmth and gentleness. That is the concept of the WEST brand.

Agaho

Form generated through the exhaustive pursuit of function.

Simple but not minimal. Unique but harmonious. Functional, and yet beautiful.

The design of Agaho originates in the approach toward such conflicting themes. Bringing out the innate beauty of the material. Forms that describe soft lines even though they look sharp, and finish that feel warm to the touch. Everything has been created with a thorough pursuit of function in order to express the spirit of hospitality that is present in the history of the name of Agaho. This is WEST's flagship series.

Agaho S-line

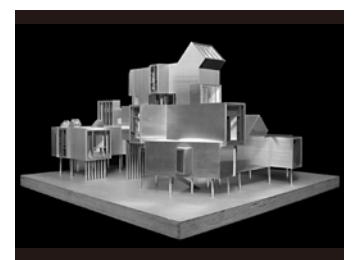

An architectural hardware series created to be coordinated.

Having selected a lever handle, other hardware items such as cabinet knobs or towel rails may be coordinated in a unified design. Agaho S-line has been created using this concept, and seven basic lever handles designs are available. The uniqueness of Agaho S-line is that the necessary items may be freely grouped as a simple design that inherits the original concept of Agaho. This series provides an unusual degree of satisfaction in selecting architectural hardware.

F.O.B. Association

FOBA is a Kyoto-based practice founded in 1995 by Katsu Umebayashi (b.1963). Ranging from furniture to landscape projects, the majority of their work comprises inventive residential design. FOBA's style is sculptural in its forms and complex in its spaces, but always emerges from close reading of the local context and a deep understanding of Japan's cultural history.

ORGAN

Atelier Bow-wow

Atelier Bow-Wow, the pair of Yoshiharu Tsukamoto (b.1965) and Momoyo Kaijima (b.1969), was founded in 1992. They began as a combined research and design practice, studying the modern vernacular of Tokyo, their home city. A series of humble yet innovative houses designs has led to larger projects and international fame, but the architects retain their original inquisitive and humorous approach.

House & Atelier Bow-Wow

Felix Claus

Born in the Netherlands, 1956. Graduated from the Delft Institute of Technology. Founding director of Claus en Kaan Architecten. Guest professor at the Swiss Federal Institute of Technology, Zurich. Grand Prix Rhéna d'Architecture (1997), Lensvelt De Architect Interior Prize (2005), Amsterdam Architecture Award (2009).

House in Jingumae

Jun Igarashi

Born in Hokkaido, 1970

Established Jun Igarashi Architects Inc., 1997
Instructor of Tohoku University, Nagoya Institute of Technology, and Hokkaido Institute of Technology, 2011
Awards:
Architectural Institute of Japan Hokkaido Architectural Encouragement Prize (1996), The 19th Yoshioka Prize (2003), The Grand Prix of Osaka contemporary theater festival's temporary playhouse competition (2004),

Biennale Internazionale di Architettura Barbara Cappochin (2005), AR AWARDS EMERGING ARCHITECTURE, The Grand Prix of American Wood Design Awards 2006/ Best of Residential (2006), AR AWARDS 2006 HONOURABLE MENTION (2006), The Grand Prix of Japan Institute of Architecture Hokkaido Branch Residential Division (2009), The 21st JIA Rookie of the Year Award (2010),

Small Atelier

Shigeki Maeda

1974 Born in Osaka
1998 Graduated from Architecture and Building engineering, Osaka National University,
1998-2000 Master school in Tokyo National Univ. of fine arts and music,
2000-2009 Worked at Dominique Perrault Architecture in Paris
2009 Established Shigeki Maeda Architecture
2010 Established Geo-graphic Design Lab.
/ Lecturer in Osaka Institute of Technology

Works/Awards
1999 Finalist for the competition “Architecture for Humanity” Transitional House for KOSOVO refugee
2001 Honorable mention for SD review/ “synagogue at Rueil Malmaison”
2005 Laureate for the competition “New metro station of Nakanoshima new line” at Osaka, Japan
2010 Laureate for the international competition of the Bangladesh cyclone shelter.

About Us

Company Name

WEST inx Ltd.

Headquarters

3-18-3 Shimeno, Neyagawa-city, Osaka
572-0077 Japan

Established

Oct. 1933

President

Yasuo Nishi

Tokyo Showroom

Osaka Showroom

WEST has its origins in a private factory founded in 1933 by Asajiro Nishi, and named “Nishi Seisakusho” (Nishi’s factory). Beginning with the manufacture of locks and hardware mainly for vessels at Mitejima, near Osaka Port, after about a decade, the product range shifted toward the category of products for house building due to the demands of rapid economic growth.

In 1965, the factory was moved to Neyagawa at a location beside the Yodo River, which was in ancient times a main artery between Kyoto and other cities and regions. In those days, the locking system for the majority of sliding doors in Japan was still a screw-in type. Our development of the CL lock, which enables users to lock in a single action, was an epoch-making event and caused a huge expansion of WEST’s market share. Following that, WEST released the Automatic Sliding Door Closer as well as the Push-Pull Lock (which releases a latch bolt by pushing or pulling the door handle). As a result of these developments, WEST became renowned as a manufacturer that creates innovative and user-friendly products.

Throughout the 1970s and 80s, along with a high increase in housing demand, our customer base expanded to include the leading house builders and door manufacturers. Our product range also widened in accordance with the needs of our clients. To meet their strict requests for quality, cost, and delivery, we have been supplying only the best products up until today.

The end of the 1980s was at the peak of the bubble economy, an era in which gaudy and gorgeous things were preferred. WEST began a new project that dared to oppose the temper of the times, because we thought it necessary to create a new product range with universality and true values, in order to further enrich the spaces of daily life. We at WEST also came to believe that the new product range must be usable in the long term while attracting a strong attachment from its users. Through this, we thought we could also carry out our social responsibility. As a result, after a process of continuous try and error, the first items in the Agaho series were created in 1992. The products that have followed the first Agaho items also embody these ideas, and indeed, most of them have received Good Design Awards (the Japanese comprehensive design evaluation and commendation system).

Our present corporate trademark, a modified letter W, was created in 1995. This shape was inspired by the tip of a Bit Key, and shows the WEST identity. WEST is proud of manufacturing locks and cylinders for the Japanese market since our establishment, and we think our roots are there. The most important requirement for manufacturing locks is reliability. Therefore, the WEST trademark is a guarantee of trust.

In 2010, “Nishi Seisakusho” (the manufacturing headquarters of WEST group) changed its company name to WEST inx Ltd. The word “inx” indicates the meaning of two words starting with “in” — “innovative” and “inspiring” — that express our company ideals, and “x” shows that the two words are joined in mutual effect. This name originates in the desire of our company to continue creating unique innovative products, and also to have a presence that may help architects and designers to create inspiring living spaces. Moreover, the name implies our stance of cutting through the coming era, and our will to revolutionize ourselves in order to match rapid changes in society.

Material and Finish

Aluminium

Material

Aluminium is the world’s most used metal after steel, mainly extracted from bauxite, and its supply is comparatively stable. In particular, aluminium is highly recyclable and the energy required to produce a recycled ingot from scrap is only about 3% of that required to produce primary aluminium. Because it is comparatively lightweight, it can be said that aluminium is also environmentally friendly in transport and delivery.

Finish

The surface is anodized after it is molded and polished, and a naturally silver oxidized layer is generated. Anodized aluminium has a unique soft gloss, feeling, warmth, and gentleness, which is very precious. Moreover, users do not need to be concerned with fingerprints on the surface, with the advantage of minimizing daily cleaning.

Special color coated products is also available on request.

Brass

Material

Brass is an alloy of copper and zinc that has an appearance similar to gold. It is a material familiar from ancient times as an interior product with elegant characteristics.

Finish

There are color choices of gold and silver to enhance any space.

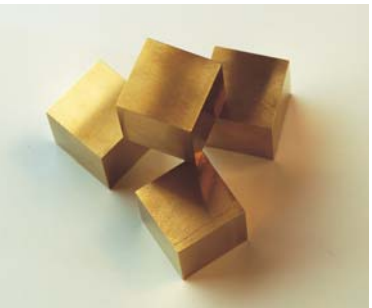

Gold Polish (GB)

This is coated with clear lacquer, which maintains the attractiveness of polished brass. Because it also prevents the patina peculiar to brass, daily maintenance is easier.

Silver Polish (SC)

This is a chrome-plate finish that fits simple space, making the most of the dignified feeling of brass.

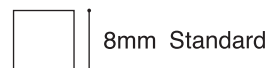

Technical Information

Lever Handle and Door Knob

Advanced Spindle Structure

A stainless steel plate is inserted into a slot of a square spindle. After setting the lever or knob to the spindle and fixing the grub screw, the plate is pushed in (figs. 1 and 2). At the same moment, the plate slides up from the edge of the spindle (fig. 3) and presses the lock-follower from inside. Extra movement between the spindle and the lock-follower can be avoided in this way, and the structure brings the smooth operation of levers and knobs.

The spindle is 8 mm square and comes with operable pairs of levers and knobs for the standard door thickness as stated below.

Available Range of the Door Thickness

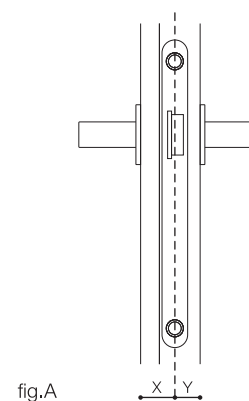

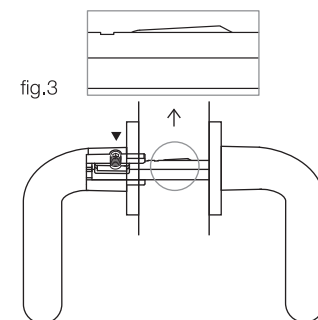

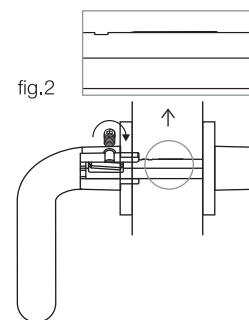

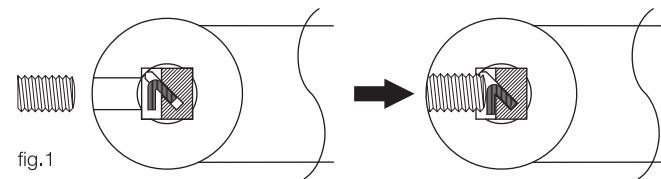

Agaho Lever Handle: 33 - 60 mm (146, 148, 149 and 185)

Agaho Door Knob: 33 - 60 mm (154, 192, 193 and 194)

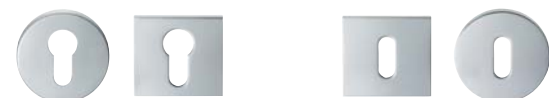

Agaho S-line Lever Handle: 35 - 50 mm (209 - 238)

Please contact us beforehand in cases where the door thickness does not match the above dimensions. Also in cases where the lock case is not in the center of the door (fig.A), inform us of the distance off-center.

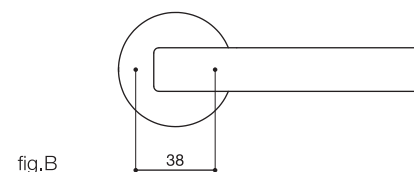

When ordering, specifying the door thickness is always required even if the thickness is in the above available range.

Rose and Escutcheon

Bolt-through concealed fixing with two screws at 38 mm distance (fig. B). Round Rose and Square Rose are interchangeable in Agaho S-line lever handles 209 to 238. Non-standard combination is available on request. Cylinder escutcheons for Euro Profile (PZ) and keyhole escutcheons for Standard Profile are available in both round and square shape.

Bathroom Set

In case of emergency, it can be unlocked with a coin from the outside. When using 952 and 952S, occupancy can be ascertained by the red indicator.

The bathroom set has an 8 mm square spindle and can be used with a lock case that have minimum \varnothing 6.5 mm through holes at 38 mm distance.

Window Handle

For Tilt & Turn windows

The handles stop in 4 positions at 90-degree intervals. Optionally, handles for night ventilation opening set that stop at 45-degree intervals are also available.

Dimensions related to installation are as follows.

Fixing Centre: 43 mm

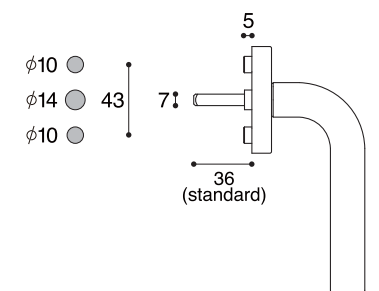

Support Lug: \varnothing 10 mm

5 mm in length

Spindle Size: 7 mm square

Spindle Projection Length: 36 mm (standard)

* Please contact us when the spindle in different length will be required.

Notes

- Hard materials such as rings might damage the surface of our products. This does not impair the functioning. It simply shows the passage of time.
- Please follow the fitting instructions provided with our products in order to carry out proper installation. Please contact us when additional information is needed.
- Technical details or information may change without notice. Please contact us when you need updates.
- Improper usage, incorrect handling, or faulty installation may cause injury or damage the product.

Examples of improper usage / prohibited acts

- * Stepping or hanging on the product.
- * Using a handle or towel rail as a hook.
- Do not hang anything heavier than specified in the fitting instructions.
- * Slamming the door open so that the handle strikes a wall.
- * Using a product as a children's plaything.

If there are any questions, please contact us.

Order Guide

How to read the article numbers

Lever Handle and Door Knob

The article numbers for lever handles and door knobs consist of the combination of Model Number and Sub Code. Especially for 217, please also confirm which is required Left-hand or Right-hand lever.

EX: 217 Lever Handle [R] + 950 Escutcheon

217-BR

Model Number

Sub Code

- A: Lever Handle
- B: Lever Handle + 950 Escutcheon**
- C: Lever Handle + 957 Escutcheon
- D: Lever Handle + 951 Bathroom Set
- E: Lever Handle + 952 Bathroom Set

Left

Right

Outside

EX: 194 Door Knob (Single-side / Fixed)

194-HF

Model Number

Sub Code

- A: Door Knob (Pair / Operable)
- AF: Door Knob (Pair / Fixed)
- HF: Door Knob (Single-side / Fixed)**

Window Handle

To identify the shape of the handle rose, the article numbers have Sub Code after their Model Number.

EX: 214W Window Handle (Square Rose)

214W-S

Model Number

Sub Code

- O: Oval Rose
- S: Square Rose**

Pull Handle

For 9401 and 9402, there is Sub Code which indicates the handle length and whether the handle is a pair or single-side.

EX: 9402 Pull Handle (Single-side / 600 mm)

9402-600H

Model Number

Sub Code

- 300: Pull Handle (Pair / 300 mm)
- 300H: Pull Handle (Single-side / 300 mm)
- 600: Pull Handle (Pair / 600 mm)
- 600H: Pull Handle (Single-side / 600 mm)**
- 1000: Pull Handle (Pair / 1,000 mm)
- 1000H: Pull Handle (Single-side / 1,000 mm)

Other point

Some of the article numbers have Color Code after their Model Number.

EX: 30M Towel Rail (Silver Polish)

30M-SC

Model Number

Color Code

- GB: Gold Polish
- SC: Silver Polish**

Things to note when ordering

- * Please specify the thickness of the door every time when ordering lever handles, door knobs, pull handles, pad handles, and sliding door lock sets (427L, 431L, 432L and 435L).
- * In cases where the lock case is not in the center of the door, note the position off-center.
- * Please arrange required anchors in cases where the provided screws cannot be used.
- * Unless otherwise agreed in writing, by submitting a sales order we assume that Buyer is agreeing to be bound by our Terms and Conditions.

Terms and Conditions

1. GENERAL

- a. Buyer must read this terms and conditions carefully before ordering any of our products, and by submitting a sales order, Buyer shall agree to be bound by this terms and conditions. Unless otherwise agreed in written, all orders and quotations apply to this terms and conditions.
- b. This terms and conditions are always valid in most recent form. Seller notify to Buyer in advance when updating this agreement.
- c. Communication between Buyer and Seller shall be in English or Japanese.
- d. Notices send from Seller to Buyer deem to reach when on rules below.
[Facsimile, e-mail]
At the time Seller has made the notice.
[Prepaid Postage, Registered Airmail]
10days after posting.

2. QUOTATION, ORDER

- a. Quotation issued by a request of Buyer does not mean the acceptance of the order.
- b. Order must be given in writing. Verbal agreements are not effective.
- c. Order shall be effective when Buyer received a written confirmation by Seller.
- d. Seller makes an effort to send order confirmation to Buyer within the next business day of the order reached. And also Seller may refuse the order. If the order confirmation will not reach to Buyer within 3 business days, confirm to Seller.
- e. Specification of product such as spindle size, door thickness shall be specified on the order.
- f. If Buyer will request an arrangement of delivery to Seller, delivery information (address, transport, insurance, etc.) shall be specified on the order or the request for quotation.
- g. Modification of the order shall be confirmed in written by prior agreement.
- h. Order can be revoked if the written revocation reaches to Seller before Seller has dispatched a confirmation.
Revocation after conclusion of order is not acceptable.

3. PRODUCTS, PRICE

- a. Price of quotation and on the price list shall be valid on order within the expiration date on each of them.
- b. Considering the cost of crude oil, raw material and exchange rate etc., Seller has right to change price freely by prior notice to Buyer.
- c. Price is not included necessary cost such as taxes, freight, packing cost, insurance fee and etc.
- d. Parts used for products may be improved without a prior notice.
- e. Buyer shall judge the product whether it is suitable to the purpose of use or not. Seller is not liable to the intended use of Buyer.

4. DELIVERY

- a. Delivery date notified to Buyer is foreseeable endeavor date of Seller.
- b. Buyer cannot refuse partial delivery.
- c. Delivery date may be revised in case of modification of order.
- d. Seller can arrange delivery as Buyer's alternative. Buyer shall specify the delivery information (address, transport, insurance, etc.) on application of quotation or on order.
- e. Unless otherwise agreed in written, Buyer shall take over risks of delivery at the time when Seller pass products to forwarder or transporter.

- f. Seller shall not be liable at the event of late delivery after shipment, which is caused by custom clearance, traffic conditions, weather conditions, and the lack of delivery information from Buyer.
- g. Seller shall not be liable at the event of late delivery which is caused by Force Majeure such as natural disasters, war, legal restrictions or any other causes beyond the control of Seller.
- h. Unless otherwise agreed in written, Buyer shall absorb freight, packing fee, insurance and other expenses.

5. PAYMENT, RETURN POLICY

- a. Unless otherwise agreed in written, payment shall be due to the date on each order confirmation.
- b. Payment shall be at telegram transfer (T/T) remittance or guarantee by letter of credit (L/C) by the currency designated on the order confirmation. Check and Bill of exchange are not acceptable.
- c. Buyer shall absorb commission charges due to the payment.
- d. In case Buyer fails to pay the price for products in time, Buyer shall pay interest at the rate of 3% above bank rate of Bank of Japan.
- e. In case Buyer fails to pay the price for products in time, Seller shall be entitled to suspend the shipment or make them delay.
- f. Return products are not acceptable in principle.

6. INSPECTION

- a. Buyer shall inspect products immediately after receiving products whether there are no defects such as damages, shortage and wrong shipping. If any of defects are detected, Buyer shall claim in written within 5 business days after receiving products and shall send photos of defect and shipping information to Seller. Seller makes effort to reply to Buyer against the claim within 5 business days after receiving the claim from Buyer.
- b. No claim in above period deemed as free from claim regarding 6-a.
- c. Concealed defects must be notified in written to Seller without delay upon detection.

7. RETENTION of TITLE

- a. Seller shall keep the title of retention of products until full amount of the payment will complete.
- b. Buyer shall be entitled to re-sell the products even if the payment is not completed.
- c. Seller shall be entitled to keep the title of retention of defective product even if the payment is completed.
- d. In case of credit insecurity (bankruptcy, proceedings of corporate reorganization) of Buyer will be disclosed, Seller shall be entitled to revoke the proceeding order or to withhold the reserved products which had already delivered to Buyer.
- e. Buyer shall keep Seller's reserved products separate from their stock, and mark them as Seller's property.

8. WARRANTY

- a. Seller guarantees the technical operation in normal use of products for a period of 2 years from the date of delivery.
In the event of claiming defects, Buyer shall submit the proof of purchase with date and other means such as photos required by Seller.

- b. Seller shall judge the suspected product by photos etc., whether it has defect or not. In addition, Seller shall be entitled to withdraw the defective product by requesting to Buyer.
- c. In case the product is assessed as defect, Seller shall undertake any of way issuing credit note, off-set statement, replace products or replace parts.
- d. Defects caused by improper handling and fixing is not acceptable. Also mere defects that reduce slight value or functionality of product are not acceptable.

9. TRADEMARK and COPYRIGHT

- a. Buyer must not refer to the name of Seller and Seller's trademarks as products in connection with any advertising without Seller's prior permission.
- b. Copyright in any catalog, brochure or other literature supplied with products shall not be infringed by Buyer.

10. GOVERNING LAW and DISPUTE RESOLUTION

- a. This agreement shall be governed by and construed in accordance with the laws of Japan including United Nations Convention on Contracts for the international Sales of Goods (CISG - "Vienna Sales Convention").
- b. All disputes or controversies shall be finally settled by arbitration to be held in Osaka, Japan administered by the Japan Commercial Arbitration Association.
