CROFT

Long Lasting Tradition

We are a family-run business that continues a long-lasting tradition of hand crafting and hand finishing the highest quality architectural hardware.

Founded in 1972 we have a long and distinguished family heritage. Our founder's grandfather first started manufacturing and selling architectural hardware items in 1868. Five generations later, we are still based in Willenhall in the West Midlands, the historic heart of the British lock and hardware industry.

Design

We design all our own products in-house and are constantly inspired by the vast collection of original patterns and dies that have been kept within our founder's family for generations. At Croft, we pride ourselves on the level of care and unparalleled attention to detail involved in making tomorrow's antiques - our long-lasting tradition.

Over the course of almost 40 years, we have acquired an unrivalled reputation for excellence. This is built on our quality craftsmanship, our ability to design and manufacture products to the very highest standards and our dedicated customer service. Today, Croft produces some of the most desirable door and window fittings available anywhere.

Made in Britain

We offer a comprehensive range of British manufactured products, all of which are made by hand by our highly experienced workforce. By combining traditional skills with modern manufacturing techniques, our craftsmen produce quality fittings that are built to stand the test of time.

Because each item is traditionally made and finished by hand, it is truly unique. And every item is individually quality checked at the end of our authentic manufacturing process - it doesn't leave our factory until we are totally happy with the smoothness of movement or the final finish.

contents

Our comprehensive range of product lines are available in an exceptional choice of 23 different finishes.

We welcome bespoke orders too, and are often commissioned to manufacture specialist items to furnish stately homes, royal palaces, government buildings, castles, period, heritage and listed buildings as well as private residences.

We also export to many countries around the world, recognised for our authentic British craftsmanship by the most discerning of customers.

entrance door
fittings

First impressions count...
create the entrance you desire with Croft quality.

1 Centre Door Knobs & Pulls

Both functional and decorative, centre door knobs are generally supplied with a bolt for rear fixing through the door, and are easy to install. A dome nut is supplied to cover the bolt on the inside.

Our centre knobs can be supplied as back to back fixing if required.

2 Door Knockers

Initially used to spare the knuckles of a visitor, door knockers are now viewed as much for decoration as their intended practical purpose. Adding elegance and distinction to any doorway, they can set your house apart from others in the street.

We offer a variety of styles to suit all tastes, ranging from our contemporary 1750 to the art deco style of our 7012.

As with a centre door knob, door knockers are generally supplied with a bolt for rear fixing through the door. Again a dome nut is supplied to complete a tidy finish on the interior of the door.

3 Letter Plates & Interior Flaps

We are able to manufacture any size letter plate that you may require, special sizes are produced from 3mm thick brass. We are also able to manufacture any size interior flap to suit your needs.

4 Bell Pushes

Designed to blend with any period building, our bell pushes are wire surface mounted allowing them to be easily connected to existing wiring.

5 Cylinder Pulls

A cylinder pull is used to assist in pulling a door closed, and as decoration around the lock. Purchase to suit the type of lock on your door.

6 Numerals & Letters

Ever since an Act of Parliament in 1765 stated that all houses should be assigned a number with the street address, door numerals have been a feature at the front of properties. Our Arial Font Design numerals and letters are available in either standard screw fix, or with a pin fixing.

We also offer Escutcheons (44-45) and Security Fittings (90)

For dimensions and technical drawings on all products in this section please visit our website. Or scan here to go straight there.

**1734****Lion's Head Centre Door Knob**

door fittings

Make any door look special with Croft fittings.

1 Lever Furniture

Traditional, contemporary, or inspired from our heritage, Croft levers represent the highest quality British products. A wide range of backplates in differing sizes are offered, as well as square roses, concealed fix roses, and plates suitable for use with multi-point locking mechanisms. All our lever furniture is supplied with a spindle and fixing screws. Many designs are available with a variety of profiles to suit whichever lock you may wish to use.

2 Knob Furniture

Manufactured to our usual high standard, all Croft door knobs are available for use with either rim locks or mortice locks. Knob furniture is supplied unsprung as standard, however the knobs can be adapted to be sprung if required. All knobs and levers can be fixed dead upon request.

Spindles with our Door Furniture - Where appropriate all products are supplied with an 8mm square spindle, unless otherwise specified. Items can be adapted and supplied with a 7.6mm square spindle to suit old locks if required, please specify this when ordering.

To reduce the strain on the fixing bolts, knobs and levers can be supplied with a slotted spindle or a threaded and grooved spindle which is grub screw fixed. The threaded and grooved spindle option provides the greatest level of protection. Both the slotted and grooved spindle and threaded and grooved spindle are 4 1/2".

3 Escutcheons

A collection of covered and uncovered designs to help protect both the keyhole and the surrounding area of the door.

4 Bathroom Turn & Releases

For use with a bathroom door lock, a choice of styles to complement our range of levers and door knobs. We also have disabled bathroom thumb turns available. Bathroom turn & releases are supplied with a 5mm spindle.

5 Pull Handles

Choose from our selection of screw fix or bolt fix pull handles to create the required impression.

6 Finger Plates & Kicking Plates

Ornate or contemporary, whatever style you wish to achieve can be complimented with our finger plates and kicking plates. Many of which can be made to order in the size of your choice.

7 Locks & Latches

Manufactured by skilled locksmiths, and cast in either brass or bronze from traditional patterns. Continuing the long-standing craft of quality British locks.

8 Flush Fittings

Ideal for use on sliding and folding doors when a normal fitting would prevent complete closing or folding of the door. Also popular on marine craft. Our 2134 and 2136 do not have a finger recess and therefore are primarily for sliding doors. The 2138 does however have a finger recess.

For dimensions and technical drawings on all products in this section please visit our website. Or scan here to go straight there.

Pages 19-21 illustrate our range of backplates.

These can be used in conjunction with the
lever styles on the following pages.

If the combination that you require is not listed please contact us as we are
able to manufacture any lever on any backplate as a special order.
